

WYATT CLARK

Chief Operations Officer

Wyatt Clark serves as the Chief Operations Officer for Savannah River Mission Completion, LLC, (SRMC) which is conducting operations at the Department of Energy's Savannah River Site (SRS) near Aiken, S.C.

Mr. Clark has more than 30 years of management experience in the areas of project management, operations, engineering, and maintenance within complex high-hazard nuclear chemical facilities, with successes in transformational initiatives using applied technology.

Prior to joining the SRMC team, Mr. Clark served as the senior vice president of environmental management operations for Savannah River Nuclear Solutions (SRNS) and was responsible for the safe execution of all environmental management operations SRS.

He also served as the Chief Operating Officer for the Hanford Tank Farms for Washington River Protection Solutions, where his responsibilities included all aspects of operations, engineering, environmental and project execution.

Mr. Clark has spent most of his career at SRS, serving in positions of increasing responsibility. He was Interim Chief Operating Officer, and Deputy Project Manager for Savannah River Remediation, and Project Director of the Tank Farm/Effluent Treatment Plant Operations, where he led the high-level waste management team to record-setting initiatives.

He also has served as the High-Level Waste Chief Engineer, and as the Facility Manager of three facilities. Mr. Clark's fuel processing experience began in the Naval Fuels Facility where he served in the roles of design engineer and shift manager.

Mr. Clark is a member of the American Institute of Chemical Engineers and the Project Management Institute.

Education:

- ◆ University of South Florida, Bachelor of Science in Chemical Engineering
