

*Integrated Mission Completion Contractor
for the U.S. Department of Energy*

Working today for a safer tomorrow

Our company

Savannah River Mission Completion is the Integrated Mission Completion Contractor responsible for Liquid Waste Operations for the Department of Energy's Office of Environmental Management.

Our location

We are located on the Savannah River Site, a 310-square-mile facility located near Aiken, S.C.

Our mission

Our mission is to safely reduce the risk to the community and the environment of radioactive liquid waste stored in aging waste tanks.

Opportunities

We offer full-time employment in disciplines such as engineering, science, business, information technology, and other technical fields. We also offer an extensive internship program with the same disciplines for uniquely skilled students who want to enhance their education with hands-on experience.

The SRMC Internship Program offers opportunities for students attending two-year technical colleges and four-year colleges and universities up to the doctoral level to gain hands-on learning experiences related to their field of study. The goal of the internship program is to bridge the gap between academic study and its application in professional practice. Participation in an internship offers students a glimpse into a professional work environment, while networking with people in your future career field.
